Attention
Please read the install instructions carefully!
The scenarios are without text.

Introduction and Description:

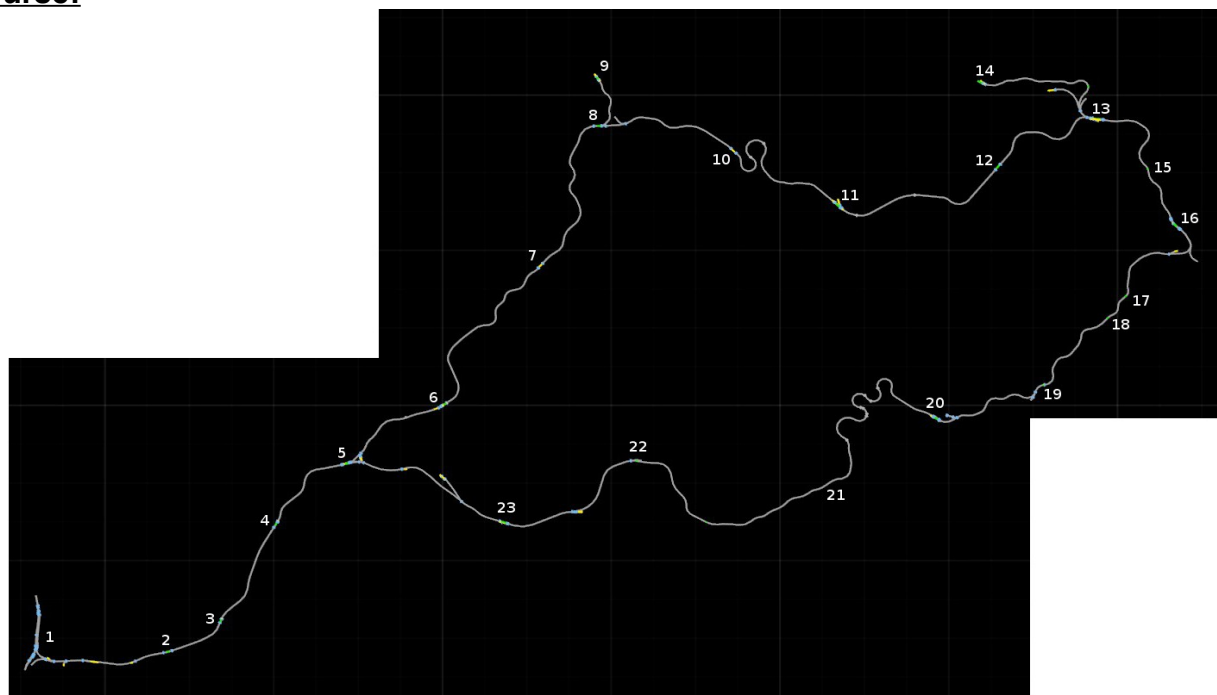

You can experience the past times of the active branch lines of Deutsche Bundesbahn here. It is about the epoch III / IV simulated so consistently shape signals are installed. Part of the route are original based, parts are fictious (being based on plans around 1900)

In particular, there are 4 track list:

1. Kronach – Nordhalben - 24,9 km (real – today only Steinwiesen – Nordhalben as stand-alone operation)
www.wikipedia.de
2. Naila – Bad Steben – 8,8 km (real – selection of the route Hof – Bad Steben)
www.wikipedia.de
3. Naila – Schwarzenbach am Wald – 9,9 km (till 1994 – dismantled in original)
www.wikipedia.de
4. Marxgrün – Dürrenwaid – 24 km (fikcional – planned route variant 1 around 1900)
5. Wallenfels – Schwarzenbach a Wald – 20 km (fictional – planned route variant 2 around 1900)

4. and 5. you can read in the book **"Die Rodachtalbahn - Geschichte der Lokalbahn von Kronach nach Nordhalben"** available at www.rodachtalbahn.de

Route Course:

1 - Kronach	2- Höfles	3 - Unterrodach
4 - Zeyern	5 - Wallenfels (Tal)	6 - Steinwiesen
7 - Mauthaus	8 - Dürrenwaid (Tal)	9 - Nordhalben
10 - Dürrenwaid (Berg)	11 - Geroldsgrün	12 - Bobengrün
13 - Marxgrün	14 - Bad Steben	15 - Oberklingensporn
16 - Naila	17 - Schottenhammer	18 - Marlesreuth
19 - Döbra	20 - Schwarzenbach am Wald	21 - Fels
22 - Schnappenhammer	23 - Wallenfels (Stadt)	

Donation Link:

If you like my route i would be pleased if you send me a small donation (with wich i can buy technical literature for example)

Installation:

Important:

If you already has installed a older version of my route you must install my assets and BF- und „Bw Objekte Paket V1.1.rwp“ again!

You get with this route 10 files:

- Rodachtalbahn Plus beta 0_92.rwp
- Assets Schienenbus 0_92.rwp
- Schienenbus_Bw_Kronach.rwp
- Lokhaus_klein_alt_Diesel_Tankstelle.rwp
- Bf- und Bw Objekte Paket V1.1.rwp
- Platanes et bouleaux.rwp
- Textures lineaire voie ferre et vegetation.rwp
- MD-Components.zip
- Readme Strecke (diese lesen Sie gerade)
- Readme Szenarios

Install these 7 .rwp files with the program Utilities.exe which you can find in the Train Simulator main directory.

There you click on „install“, choose all 6 files and click on „open“.

The rest makes the program.

The „**md-components.zip**“ file unzip to: Steam\SteamApps\common\RailWorks\Assets\

Thanks to:

- BeeKay - for the provision of his Steam-depot parts
- Michael Huebner - that i got the permission to pack his „MD-Components“ with my route
- Rschally - that i got the permission to pack his Depot-parts with my route
- StS (Rail-Sim) - for his great help
- Sandra-Marion - for the lovely vehicles
- ice - for the nice small fuel station and the permission to pack it with my route

Allen Asset builders without whom I would not have the route to go and all the other people I was able to perforate with questions and have always been very good helped me.

Disclaimer:

By judgment of 12 May 1998 the Regional Court of Hamburg ruled that by adding a link has to answer for the contents of the linked pages. This can only be prevented by explicitly distancing oneself from this content. Therefore I dissociate myself from all contents of all linked pages these installation instructions and do not care to their contents.

Kontakt:

If you find errors or have other suggestions regarding the route you can send me a email to: <mailto:info@schienenbus.net> .
